

POPLAR **PLYWOOD**

TWIN Mdf

INVERNIZZI
Plywood Tradition

Homogeneous surface for all types of processing

TWIN MDF poplar plywood is a natural product made using poplar veneers (at least 3 layers) overlapped with perpendicularly crossed grains and glued together. The outer faces are coated with MDF.

It adapts to various fields of application thanks to its ease of processing and complies with Commission Regulation (EU) 2023/1464 on emission control, amending Annex XVII of the REACH Regulation. Upon request, it is also available with **ULEF** certification.

The main features of the panels are: **face homogeneity**, **lightweight**, and **good mechanical performance**. The panel is produced with respect for the environment and with minimal use of chemical additives.

Each panel undergoes **6 quality controls**, one for each production phase.

IDEAL FOR: Surfacing, veneering and/or lamination.

Not ideal for: high structural loads and outdoor applications without treatments

CERTIFICATIONS: FSC or PEFC, CE, CE2+.

APPLICATIONS: Fittings, Furniture and Interior Design, RV - Motorhomes and Caravans, Distribution, Doors and Windows.
