

Colours for every application

TWIN Primed poplar plywood is a natural product manufactured using poplar veneers (at least 3 layers) overlapped with perpendicularly crossed grains and glued together. The **outer faces are painted in white, or other colours upon request**. The paint used is **water-based**.

It adapts to various fields of application thanks to its ease of processing and complies with Commission Regulation (EU) 2023/1464 on emission control, amending Annex XVII of the REACH Regulation. Upon request, it is also available with **ULEF** certification.

The main features of the panels are: **lightweight, uniform faces and cores**, and **good mechanical performance**. The entire product is manufactured with respect for the environment and with minimal use of chemical additives.

Each panel undergoes **6 quality controls**, one for each production phase.

IDEAL FOR: painting.

Not ideal for: high structural loads and outdoor applications without treatments

CERTIFICATIONS: FSC or PEFC, CE, CE2+.

APPLICATIONS: Fittings, Furniture and Interior Design, RV - Motorhomes and caravans, Distribution, Building and Construction.
